NEW MANAGING DIRECTOR OF CSBP

Ian Hansen has been appointed Managing Director of CSBP Limited, the chemicals and fertiliser division of Wesfarmers, effective from 1 October 2007.

This follows today's announcement that the current Managing Director of CSBP, Keith Gordon, will take on the new role of Business Integration Director in leading the Wesfarmers team to plan and implement the integration of the Wesfarmers and Coles Group businesses.

The Managing Director of Wesfarmers, Richard Goyder, said Ian Hansen was superbly qualified to replace Keith Gordon at CSBP.

"Ian has worked for CSBP for more than 20 years and since 2002 has been General Manager, Chemicals with the division," he said.

"As a member of the CSBP board he brings to the position an extensive knowledge of the division's operations. He is also well known in the Kwinana industrial area, the location of CSBP's main production complex, having served for two years as President of the Kwinana Industries Council. I very much look forward to working with Ian in his new capacity and as a member of the Wesfarmers Executive Committee."
